Detailed Specifications

1. Workout Header

Elements:

- **Title:** Large, bold, uppercase (e.g., "HIGH INTENSITY PULL FOCUS")
- **Coach Overview:** 2-3 sentence description, regular weight
- **Metadata Badges:** Pill-shaped badges showing:
 - Estimated time (45m)
 - Intensity level (8)
 - Anchor type (PULL)

Style:

- Typography: Rajdhani (title), Inter (overview)
- Badges: Glassmorphic with subtle glow

2. Section Cards (Collapsed State)

Display:

- Section name (uppercase, bold)
- List of exercises with rep schemes
- Chevron icon (▼) indicating expandable

Example:

PRIMARY LIFT

Barbell Bent-Over Row (4x8)

Regression: Seated Cable Row

Interaction:

- Tap anywhere on card → expands to show details

Style:

- Glassmorphic card with blur
 - Subtle border glow
 - Adequate spacing between cards
-

3. Section Cards (Expanded State)

Display:

- Section name at top
- Individual exercise cards with full details
- "Randomize Section" button at bottom

Exercise Card Shows:

- Exercise name
- Sets × Reps @ Effort%
- Tempo notation (e.g., "2-1-2")
- Rest time (e.g., "90s")
- Historical data range (e.g., "Last: 115-135lbs")
- Coaching cues (collapsed by default? or always visible?)
- Regression/Progression options

Randomize Section Button:

- Ghost/outline style
- Text: "↺ RANDOMIZE SECTION"

- At bottom of expanded section card

Interaction:

- Tap exercise name → edit modal/overlay
- Tap "Randomize Section" → regenerates just that section

Style:

- Exercise cards: Nested cards within section card
 - Slightly different background/border to show hierarchy
-

4. Historical Data Display

Format: "Last: [LOW]-[HIGH]lbs"

Logic:

- Shows range from your history for that movement
- Covers different rep schemes (5×5 vs 3×12)
- Helps you quickly gauge appropriate weight

Placement:

- Under sets/ reps, before coaching cues
- Subtle text color (not primary emphasis)

Style:

- JetBrains Mono font (technical data)
 - Lime or neutral color
-

5. Edit Functionality

Trigger: Tap exercise name

Action: Opens edit modal/overlay with:

- Text input to change exercise name
- (Future: list of similar movement alternatives)
- Ability to edit sets/reps/tempo (optional for MVP)
- Save/Cancel buttons

Style:

- Modal slides up from bottom
 - Glassmorphic background
 - Primary CTA for "Save"
-

6. Coaching Cues

Content: Brief technical notes (e.g., "Neutral spine, bar to ribcage")

Display Options:

- **Option A:** Always visible in exercise card
- **Option B:** "Show Cues" link to expand (saves space)

Recommendation: Always visible if under 1 line, collapsible if longer

Style:

- Smaller text, muted color
 - Italic or different font weight
 - Bracketed or indented
-

7. Action Buttons

Start Workout:

- Position: Sticky at bottom (always visible)
- Style: Primary CTA (orange gradient, glow)
- Text: "START WORKOUT" with arrow
- Large touch target

Randomize Section:

- Position: Bottom of each expanded section card
 - Style: Ghost/outline button
 - Text: "↺ RANDOMIZE SECTION"
 - Medium size, not competing with main CTA
-

User Flow

1. User lands on Review screen after generation
 2. Sees workout title, overview, metadata at top
 3. Scrolls through collapsed sections to get overview
 4. Taps section to expand and see full details
 5. Reviews exercises, checks historical data for weight guidance
 6. (Optional) Taps exercise name to edit/swap movement
 7. (Optional) Taps "Randomize Section" to regenerate a section
 8. When satisfied, taps "START WORKOUT" at bottom
 9. → Transitions to Screen 3 (Workout Mode)
-

Mobile-First Considerations

- **Collapsible sections:** Reduces scroll length, faster scanning
 - **Large touch targets:** Section headers, exercise cards, buttons
 - **Historical data prominent:** Quick reference without extra taps
 - **Edit modal:** Full-screen overlay for easy text input
 - **Sticky CTA:** Always accessible, no need to scroll to bottom
 - **Section randomize:** Per-section control without regenerating entire workout
-

Design System References

- **Colors:** Purple/indigo primary, orange accent, lime for data
- **Typography:** Rajdhani (headers), Inter (body), JetBrains Mono (data)
- **Cards:** Glassmorphic with backdrop blur, nested hierarchy
- **Buttons:** Primary CTA (orange glow), ghost (outline only)
- **Aesthetic:** Cyberpunk utilitarian, functional HUD elements
