Equipment List (By Tier)

Each tier includes everything from the tier below it. Users can toggle any item on/off in the customization accordion.

Minimal

- Bodyweight (*always on, non-removable*)
- Resistance Bands
- Mat
- Foam Roller

Home Gym

Includes Minimal, plus:

- Dumbbells
- Kettlebells
- Bench (flat)
- Pull-up Bar
- TRX / Suspension Trainer
- Treadmill

Building Gym

Includes Home Gym, plus:

- Barbell
- Squat Rack / Cage
- Cable Machine

- Adjustable Bench (incline/decline)
- Lat Pulldown
- Rowing Machine

Full Gym

Includes Building Gym, plus:

- Leg Press
 - Smith Machine
 - Hack Squat
 - Chest Press Machine
 - Shoulder Press Machine
 - Leg Curl / Extension Machines
 - Pec Deck / Fly Machine
 - Assisted Pull-up/Dip Machine
 - Battle Ropes
 - Assault Bike / Air Bike
 - Stair Climber
-

Workout Sections

Section	Description
Warm-up	Light movement to get your body ready
Mobility	Focused flexibility and range of motion work
Primary Lift	The main heavy movement — squats, deadlifts, presses
Accessory	Supporting work for the primary lift
Skill / Power	Explosive movements — jumps, throws, Olympic lifts
Carries	Loaded carries — farmer's walks, suitcase carry

Section	Description
Core	Rotational and stability work for your midsection
Stability / Balance	Single-leg work, proprioception focus
Conditioning	Cardio, circuits, or higher-intensity finishers
Cooldown	Stretching and recovery to end the session

Total: 10 sections

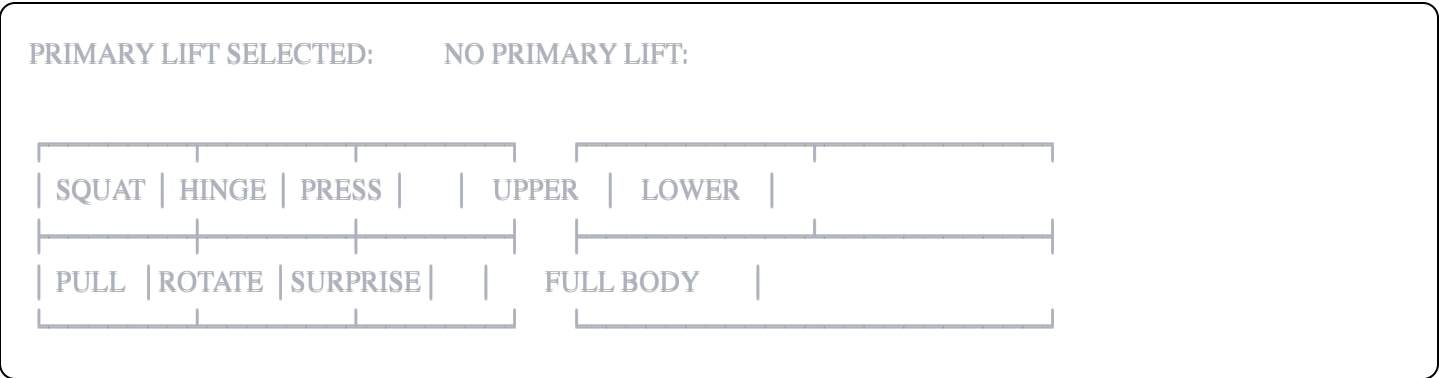

Anchor Logic

The anchor selection on the Generation Screen (Screen 1) changes based on whether Primary Lift is included in the user's workout structure.

Rule 1: Primary Lift determines anchor type

Primary Lift Selected?	Anchor Options
✓ Yes	SQUAT, HINGE, PRESS, PULL, ROTATION, SURPRISE
✗ No	UPPER BODY, LOWER BODY, FULL BODY

Visual on Generation Screen:

Rule 2: Accessory depends on Primary Lift

Primary Lift Selected?	Accessory Available?
✓ Yes	✓ Yes (visible, toggleable)

Primary Lift Selected?

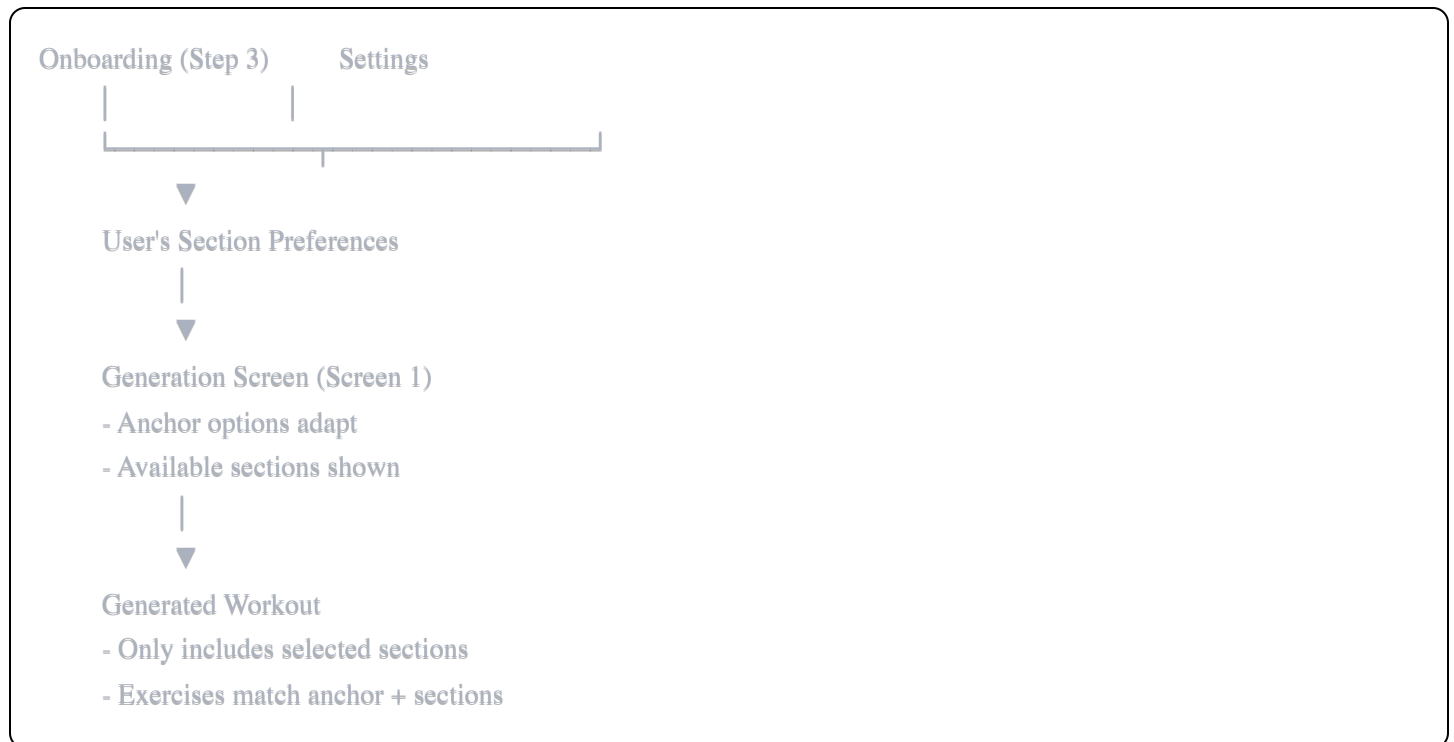

Accessory Available?

✗ No

✗ No (hidden or disabled)

Rationale: Accessory work supports the primary lift. Without a primary lift, the concept of "accessory" doesn't apply — the workout becomes more general movement-based.

Rule 3: Section selection flows through the app

Goal Presets

Each goal preset auto-selects a recommended set of sections. Users can customize after selecting.

Strength

Focus: Heavy lifts, longer rest, minimal cardio

Default sections:

- ✓ Warm-up
- ✓ Mobility
- ✓ Primary Lift
- ✓ Accessory

- ○ Skill / Power
- ○ Carries
- ✓ Core
- ○ Stability / Balance
- ○ Conditioning
- ✓ Cooldown

Balanced

Focus: A little of everything

Default sections:

- ✓ Warm-up
- ✓ Mobility
- ✓ Primary Lift
- ✓ Accessory
- ○ Skill / Power
- ○ Carries
- ✓ Core
- ○ Stability / Balance
- ✓ Conditioning
- ✓ Cooldown

Conditioning

Focus: Circuits, supersets, shorter rest

Default sections:

- ✓ Warm-up
- ✓ Mobility
- ○ Primary Lift
- ○ Accessory
- ○ Skill / Power

- ✓ Carries
- ✓ Core
- ✓ Stability / Balance
- ✓ Conditioning
- ✓ Cooldown

Note: No Primary Lift = anchor changes to UPPER/LOWER/FULL BODY

Quick & Effective

Focus: Fewer sections, get in and out

Default sections:

- ✓ Warm-up
- ○ Mobility
- ✓ Primary Lift
- ○ Accessory
- ○ Skill / Power
- ○ Carries
- ✓ Core
- ○ Stability / Balance
- ○ Conditioning
- ✓ Cooldown

Note: 4 sections only — respects time constraint

Future Considerations

1. **Equipment categorization** — If list grows, group by type (Cardio, Machines, Free Weights, Accessories)
2. **Section ordering** — Should users be able to reorder sections, or is order fixed?
3. **Custom presets** — Should users be able to save their own goal preset?
4. **Equipment-section dependencies** — Some sections may require certain equipment (e.g., Carries needs kettlebells/dumbbells)
