

## Clear - Home / Dashboard (Wireframe)

**Created:** December 22, 2025

**Status:** Locked for MVP

**Phase: 2C Complete**

## Purpose

Landing screen for returning users. Provides quick access to workout generation and surfaces habit-reinforcing data (streaks, recent workouts).

**Context:** User opens app, wants to either start a workout or check their progress.

## ASCII Wireframe

Elements

Header

- **CLEAR** logo (left)
- **Hamburger menu** (right) → Opens settings

## Generate Workout (Hero CTA)

- **Style:** Primary CTA, large, prominent
- **Action:** Tap → Screen 1 (Generation Input)
- **Copy:** "Set intensity, anchor, and build your session"

## Quick Start (Secondary CTA)

- **Style:** Secondary button, smaller than Hero
- **Display:** Shows auto-suggested intensity + anchor based on workout history
- **Action:** Tap → Skips Screen 1 & 2, goes directly to Screen 3 (Workout Mode)
- **Logic:**
  - Intensity: Based on previous day's workout (recovery logic)
  - Anchor: Auto-rotates to avoid recent repeats (e.g., if yesterday was SQUAT and before was HINGE, suggest PRESS)
- **Empty state:** If no history, shows "Start your first workout" instead

## Streak Tracker

- **Display:**
  - Large day count with fire emoji (e.g., "12 days 🔥 ")
  - Week view showing 7 boxes (Mon–Sun)
  - Filled (●) = workout completed
  - Empty (○) = no workout yet
- **Mark Rest Day button:**
  - Ghost/outline style
  - Action: Confirms with prompt → Marks today as rest (different icon, streak preserved)
- **Rest day abuse prevention:**
  - 3+ consecutive rest days → Prompt: "Everything okay? Taking a break, or dealing with something?"
  - Options: "Just resting" / "Injury or sick"
  - "Injury or sick" → Pauses streak (doesn't break), resumes when back

Recent Workouts

- **Display:** Last 3 completed workouts
  - **Card content:**
    - Date (or "Yesterday" / "Today")
    - Anchor type (HINGE, SQUAT, PRESS, etc.)
    - Intensity level
    - Duration
  - **Action:** Tap card → Session Detail screen
  - **"View All History" link:** Goes to full History screen
- 

Navigation

| Action                  | Destination                          |
|-------------------------|--------------------------------------|
| Tap "Generate Workout"  | Screen 1: Generation Input           |
| Tap "Quick Start"       | Screen 3: Workout Mode (skips 1 & 2) |
| Tap hamburger menu      | Settings                             |
| Tap recent workout card | Session Detail                       |
| Tap "View All History"  | History screen                       |

---

Mood Tracker Note

Mood tracker was considered for this screen but moved to **Summary screen** (post-workout). Capturing mood after a workout is more meaningful than before.

---

Mobile Considerations

- Hero CTA should be thumb-reachable (middle of screen)

- Quick Start should be immediately visible without scrolling
  - Streak + Recent may require scroll on smaller screens — that's acceptable
  - Week view boxes need adequate touch targets if they become interactive later
-
