

Clear - Summary Screen (Wireframe)

Created: December 22, 2025

Status: Locked for MVP

Phase: 2F Complete

Purpose

Post-workout completion screen. Captures mood, optional notes, shows streak update, and returns user to Home.

Context: User just finished their last section (Cooldown), tapped "Finish" in Workout Mode — now they land here.

ASCII Wireframe

WORKOUT COMPLETE

NICE WORK!

SQUAT • INTENSITY 8

51 min • 6 sections

HOW DO YOU FEEL?

← Tap one

SESSION NOTES (OPTIONAL)

- Celebration emoji (🎉)
- "NICE WORK!" message
- Workout details: Anchor type, Intensity level
- Duration + section count

Mood Tracker

- 5 emoji options: 😞 😐 😊 😄 😁
- Tap one to select (single select)
- Optional but encouraged
- Saves with workout data for future analysis

Session Notes

- Optional free text textarea
- Placeholder: "Add any notes about this workout..."
- For overall reflections (vs. per-exercise notes captured during Workout Mode)

Streak Update

- Shows increment animation: "12 → 13 days 🔥 "
- Week view with today's box now filled
- Positive reinforcement moment

Finish Button

- Primary CTA
- **Auto-saves** workout data (mood, notes, all exercise data from session)
- Returns to Home/Dashboard

Interactions

Action	Result
Tap mood emoji	Selects it (single select, can change before Finish)
Type in notes field	Text saved with workout
Tap "FINISH"	Auto-saves everything, returns to Home

Data Saved on Finish

- Date/time
 - Anchor type
 - Intensity level
 - Duration
 - Sections completed
 - All exercises with sets/reps
 - Per-exercise notes (from Workout Mode)
 - Session notes (from this screen)
 - Mood selection
-

Navigation

Action	Destination
Tap "FINISH"	Home / Dashboard

Note: No back button — user has completed the workout. Only path is forward to Finish.

Edge Cases

No mood selected: Allow finish — mood is optional

No notes entered: Allow finish — notes are optional

App closed before Finish: Workout data held in memory is lost. Consider auto-save during Workout Mode for future enhancement.
